- 📶 Mobile hanger
- 📶 Mobile tripod
- ⊕ Additional game packs
- ✎ Interactive pens
- 🏐 Balls for the interactive wall

The most popular model of interactive flooring. Created for schools and kindergartens that emphasize modern and attractive education. EDUFLOOR is an excellent solution supporting learning at an early stage of education - from learning simple activities, through learning letters and numbers, learning English, or working with children with special educational needs.

EDUFLOOR ONE, as the only solution on the market, enables functional upgrades - from an interactive floor, through a mobile solution, to the QUATRO interactive system - an interactive floor and wall in one device.

EDUFLOOR ONE

Product card

Projector

Resolutions	1280x800
